📈 Portfolio

AI/ML Engineer in training with hands-on experience building Generative AI, NLP, and Computer Vision systems end-to-end — from retrieval-augmented generation pipelines to fine-tuned voice and detection models. Comfortable across the ML lifecycle: data processing, training/fine-tuning, evaluation, and deployment-oriented backend integration.

TECHNICAL SKILLS

Languages: Python, Java, SQL

AI / Machine Learning: Generative AI, RAG Pipelines, LLMs, NLP, Computer Vision, Fine-Tuning, Zero-Shot & Few-Shot Learning

ML Libraries & Tools: Scikit-learn, Sentence Transformers, ChromaDB, PyMuPDF, Pandas, NumPy, Ollama

Data & Web: EDA, Matplotlib, Seaborn, Tableau, FastAPI, HTML/CSS/JS

Soft Skills: Leadership, Problem Solving, Attention to Detail, Collaboration, Communication

PROFESSIONAL EXPERIENCE

Tech Intern — Neeyat AI

Mar 2026 – Aug 2026

Diagnosed and resolved critical bottlenecks across AI tooling and workflows, enhancing system efficiency through creative troubleshooting.

Gen AI Intern — Cyart

Jul 2025 – Jan 2026

Co-engineered core components of Text-to-Speech (TTS) pipelines, supporting cross-functional team projects from development to deployment.

Data Analyst Intern — Treadalytrix

Jun 2025 – Jul 2025

Translated raw business data into strategic insights by designing data models and performing rigorous statistical analysis to guide executive decisions.

KEY PROJECTS

VisionVault - Offline Personal RAG Knowledge System

Built a modular RAG pipeline: PDF ingestion (PyMuPDF), custom chunking, local embeddings (BAAI/bge-small-en-v1.5), and semantic search via ChromaDB - each component independently tested.

Architected for full offline operation with a planned Ollama local-LLM layer and FastAPI/React app, giving users complete control over what their AI can access.

MineSentinel

Built the two-stage AI risk pipeline for a real-time mine subsidence early-warning system: Isolation Forest for anomaly detection and XGBoost for subsidence-risk prediction on multi-sensor IoT time-series data.

Improved Text-to-Speech (TTS) System

Cloned and extended the VALL-E-X model, adding multi-voice detection, synthesis-error identification, and a voice/text accuracy-scoring module.

Person Detection (FDFR) & Loan Eligibility / Housing EDA

Fine-tuned an RF-DETR model for real-time person detection; separately built a loan-approval classifier and ran EDA on housing data to surface key price drivers.

Certification

Artificial Intelligence & Machine Learning

Pregrad

Python Course

Shree L.R. Tiwari college of Engineering

Generative AI

Nasscom

Applied AI Engineer

Surfboard Ventures / edQuest, 2026

App Development Bootcamp

Shree L.R. Tiwari college of Engineering

EDUCATION

Shree L.R. Tiwari College of Engineering, Mumbai

2024 – Present

Bachelor of Engineering in Computer Engineering | CGPA (SE): 8.93

Royal College of Arts, Science and Commerce, Mumbai

2022 – 2024

HSC (Science Stream) | Percentage: 93.4%
